

Additional Considerations

What happens if a FireCode isn't showing up? Or data doesn't seem to be flowing through IRWIN? There are a few ways to troubleshoot.

1. Under Utilities – IRWIN Status, check for incident awaiting upload to IRWIN
2. If there is a value in the field, then there are issues with the connection to the server

3. Sometimes a FireCode does not get returned because a Unit does not have an NWCG Unit ID – this must be resolved before a code will be returned

The image shows a screenshot of the 'Units' table in WildCAD. The table has columns for Unit Code, Describe, Incidents, IncNumSet, StateCode, LastFireNum, NWCG UnitID, and Agency. A circled '3' is placed over the NWCG UnitID column. The table contains the following data:

Unit Code	Describe	Incidents	IncNumSet	StateCode	LastFireNum	NWCG UnitID	Agency
SNF	Sierra NF	True	0			CASNF	N/A
MMU	Madera-Mariposa RL	False					N/A
FKU	Fresno-Kings RU	True				CAFKU	N/A
SQF	Sequoia NF	False					N/A
YNP	Yosemite NP	True				CAYNP	N/A
LUR	San Luis NWR	True	0			CALUR	N/A
FSD	Fresno Co Sheriff	False					N/A
MDSO	Madera Co Sheriff	False					N/A
MRSD	Mariposa Co Sheriff	False					N/A
STF	Stanislaus NF	False					N/A
CFG	CA Fish & Game	False					N/A
KNP	Kings Canyon NP	False					N/A
